EMERGENCY AIR REQUEST CHANNELS

NOTE:

1. Ground unit notifies any aircraft of emergency situation.
2. Aircraft receiving emergency request for air support relays to CRC/CRP.
3. Control and Reporting Center/Control and Reporting Post (CRC/CRP) passes emergency request to ASOC. ASOC coordinates with CTOC for approval and diverts airborne FAC and fighter aircraft; or CRC/CRP passes request to USMC TADC for USMC support.
4. FAC may be scrambled if not with ground unit. If FAC not available, ground commander may accept responsibility for strike provided he can mark target and/or can communicate with strike aircraft.
5. Forward air controller
